Project Costing

Manage budgets, track time, and stay updated on costs, keeping projects on track and within budget.

Many businesses struggle to keep projects on schedule and within budget due to limited visibility into time tracking, budget management, and cost updates. Without real-time data, it's easy for projects to exceed budgets, miss deadlines, and waste resources, resulting in inefficiencies and unnecessary costs. Project Costing in the Time solution provides real-time visibility into budgets, time tracking, and project costs. With detailed breakdowns and insights, it helps you stay on top of spending, ensuring your projects remain on track and within budget.

How it Works

Project Costing allows you to easily set up project budgets in any supported currency, and automatically track spending in real-time. With integrated time tracking, employee hours are included in your project costs, while detailed reports offer insights to identify spending trends and guide informed decision-making.

Benefits

Easily set budgets:

Quickly set up budgets in any supported currency, simplifying budget management no matter where you do business. The solution automatically calculates real-time budget spend, enabling you to make proactive adjustments to keep your projects on budget.

Seamlessly track time:

Because the project costing tools are part of the Time solution, employee hours worked will be automatically included in your project spending — helping you save time and drive efficiencies.

Gain valuable insights:

Discover key real-time insights such as spending trends with our comprehensive point-in-time project costing reports — offering you a clear view of your cost and budget data, making trend identification a breeze.

With our Project Costing solution, you can ensure your projects stay on schedule and within financial limits. Learn how this tool can optimize your cost management and fuel your business's growth today.
