

Welcome to the future of work.

Empower your team with easy to access, data-driven insights fully customized to their needs. Bryte AI is more than a tool; it's a trusted, people-first partner. By leveraging data about your people, work, and culture, Bryte works alongside your teams to deliver personalized guidance. The result is a more supportive, thriving workplace where every employee, manager, and executive is empowered to achieve better outcomes, making your journey toward becoming a truly great workplace easier and more human than ever before.

The following functions are embedded directly into the platform and available to you at no additional cost.

Core HR Functionality

Custom Form Builder³

Upload a PDF of a custom form with Bryte AI. The system will automatically analyze it and place a field type in the right spot to recreate that form in the system.

Additional HR-Related Functionality

Performance Review Refinement¹

Quickly enhance your performance review comments to be clear and professional for better communication between employees and managers

Job Genius & Interview Guide²

By entering the tasks and skills needed for a role, instantly generate a job description and recommended interview questions aligned to your corporate culture

Benefit Formula Generator³

Enter a description of the calculation you need to generate a formula you can use. It works for any "coverage amount" type.
